The ATLANTIC AVITAILLEMENT (AA) company is a general ship supplier (shiphandler) since 1995 supplying: deck and cabin equipment, PPE (Personal Protective Equipment), rigging and fittings, fresh, dry and frozen food products, industrial fishing equipments, maintenance products and fuel additives...

AA, which is specialised in **industrial fishing**, was able to diversify over the years and now does business with **oil platforms, site facilities, industrial hoisting companies, shipyards, food industries, mining and forestry operations**, etc. as well.

Based at the Port of Concarneau (Brittany - France), AA is recognised both in France and worldwide for supplying quality products at a quality / price relationship that is very competitive.

→ QUALITY OF A SERVICE . . .

1 – Quotation

FoodAApro guarantees a prompt reply to your enquiry, including a detailed quotation and our best terms (quantities, marks, weights in compliance with requirements!).

2 – Agreement

Once the firm order is placed, we keep you updated about the exact delivery date. Said delivery is done as per your convenience to the address you select. We can arrange all kind of transport upon request.

3 – Order preparation

Experience, quality of the products, and NO short deliveries!

4 – Documents

Each delivery is accompanied by a set of documents including the invoice, the packing lists (one list per Boxpaal) and a bill of lading, and the veterinary certification.

5 – Always listening . . .

Our daily work is dedicated to answering all your demands and to reach 100% satisfaction!

→ OUR BOXPAALS...

When requested, we prepare the delivery of food supplies (dry and frozen) and maintenance products in reinforced triple layer cardboard boxes (resistance close to that of wood) that are treated against humidity: This is Boxpaal.

In addition, we use three pallet skids that have four openings (allowing for handling with all types of pallet trucks) which of course are NIMP15 treated.

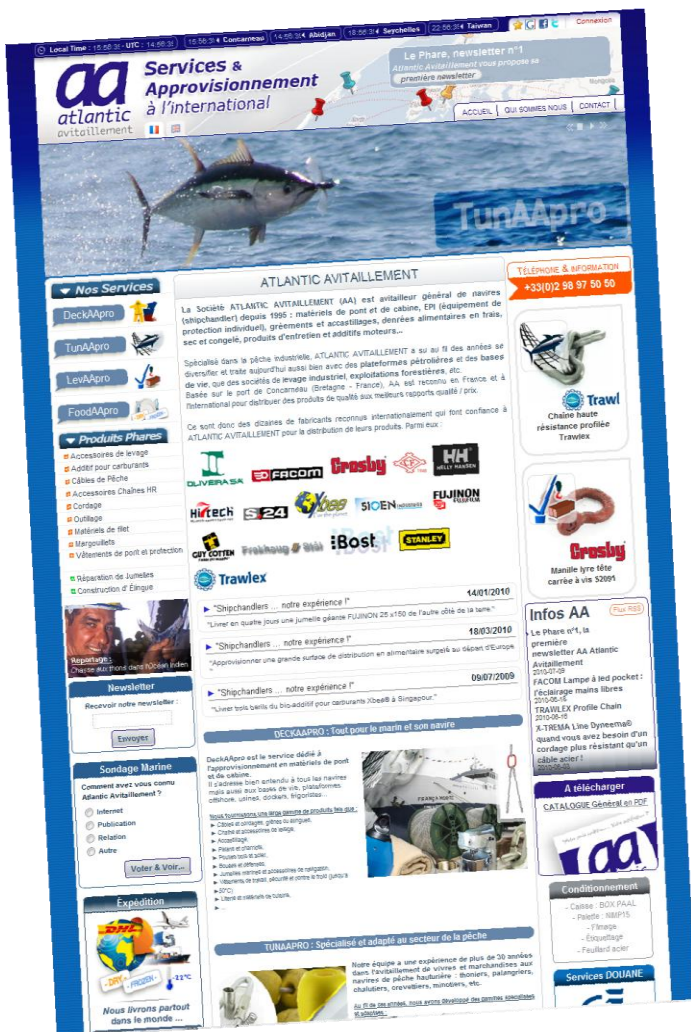

These two dimensions make it possible to adapt the packaging according to the order volumes. This also allows us to optimise the container (20" or 40"; dry or reefer) in order to fully exploit its volume.
